EDUCATION

Glenforest Secondary School

International Baccalaureate (IB)

Mississauga, ON

2022 – Present

EXPERIENCE

Software Developer

Jun 2025 – Present

NeurotechUoft

- Developed full-stack features for the official research club website using Next.js, React, and TypeScript.
- Built reusable UI components and structured API endpoints for scalable development.
- Created a CI/CD pipeline using GitHub Actions that automated builds, deployments, and WHC domain routing.
- Collaborated with a small engineering team to redesign platform structure and improve workflow documentation.

Skills: Next.js, TypeScript, React, Tailwind CSS, Git, GitHub Actions

Lead Web Developer

Jun 2024 – Present

FutureMD

- Maintained and expanded the nonprofit's website used by students preparing for medical careers.
- Developed a newsletter system to send formatted email updates to all subscribers.
- Built a JSON-powered blog with dynamic routing for simple content updates without code changes.
- Led UI/UX improvements, optimized SEO, and standardized branding across pages.

Skills: Next.js, TypeScript, Tailwind CSS, SEO, Figma, Git

Team Lead

May 2024 – Present

VEX Robotics (31331B)

- Led a competitive robotics team at events across Ontario and Canada, managing build, code, and match strategy.
- Programmed autonomous and driver-control systems in C++ using tuned PID motion algorithms.
- Oversaw mechanical subsystem design in Fusion 360 and maintained engineering documentation.
- Trained team members in design principles, coding foundation, and match analysis.

Skills: C++, Python, PID Control, Fusion 360, Team Leadership, Git

PROJECTS

Sitemaker

Next.js, TypeScript

Live Demo

2025

- Built a platform that converts resumes into polished personal websites. Used by 500+ people.
- Implemented a secure pipeline that processes uploads without storing user data.
- Designed responsive, customizable templates focusing on readability and clean presentation.
- Optimized rendering performance and improved accessibility for mobile users.

Skills: Next.js, TypeScript, Tailwind CSS, Git

GQ Planets

Python, PyTorch, Flask

Model + Web App

2025

- Developed a neural network that detects exoplanets using Kepler, K2, and TESS mission data.
- Achieved 83 percent accuracy and 94 percent recall using merged and preprocessed datasets.
- Built a web interface supporting single predictions, batch CSV uploads, and result downloads.
- Added visual tools including ROC curves, confusion matrices, and confidence scoring.
- Won Most Innovative and selected as a Global Nominee at the NASA Space Apps Hackathon.

Skills: Python, PyTorch, Flask, Machine Learning, Data Processing
