EDUCATION

Queen's University

Bachelor of Applied Science (BASc) in Computer Engineering

Kingston, ON

2026 – 2030

EXPERIENCE

Obotz Robotics and Coding

Nov 2025 – Present

Teaching Assistant

- Teach students aged 6–13 through a structured 7-level curriculum covering electronics, circuits, and block-to-Arduino C++ programming.
- Guided students in building and programming robotics projects using sensors, motors, and microcontrollers.
- Debug hardware and software issues in real time and explain core concepts step by step.

Skills: Communication, Collaboration, Electronics, Arduino, Problem Solving, Microsoft Excel

NeurotechUoft

Jun 2025 – Jun 2026

Software Developer

- Developed full-stack features for the official research club website using Next.js, React, and TypeScript, reaching 1,000+ website views.
- Worked with director to configure email domain forwarding, supporting communications for 3,000+ students and researchers across the University of Toronto.
- Created a CI/CD pipeline using GitHub Actions that automated builds, deployments, and domain routing.

Skills: Next.js, TypeScript, Tailwind CSS, Git, GitHub Actions, Communication, Collaboration

FutureMD

May 2024 – May 2026

Founder / Vice Director

- Founded and led a registered nonprofit platform for students pursuing medical careers, reaching over 87,000 website views.
- Led sponsorship outreach and secured a \$3,000 operating budget with federal grants to support workshops and student events.
- Used Google Analytics to track website traffic and guide content, SEO, and user experience improvements, improving reach by over 20%

Skills: Next.js, TypeScript, PostgreSQL, Tailwind CSS, Google Analytics, Figma, Git

PROJECTS

Seva Eats

December 2025 – June 2026

Website

- Built and deployed a cross-platform iOS and web app connecting gurdwaras' langar programs with people in need.
- Engineered a custom route optimization algorithm built on top of Dijkstra's algorithm to match volunteers with nearby delivery requests, minimizing travel distance and delivery time.
- Built the mobile app in Expo and the web app in Next.js, backed by Supabase for authentication, orders, and real-time tracking in PostgreSQL.

Skills: Expo, React Native, TypeScript, Supabase, PostgreSQL, Route Optimization, Full-Stack Development

GFSS Calendar

September 2025 – June 2026

Website

- Built and deployed a full-stack calendar platform used by over 1,500 students at Glenforest Secondary School.
- Increase attendance for school events by approximately 42% by centralizing event discovery, schedules, and reminders.
- Designed the backend using PostgreSQL, Supabase, and Prisma ORM, implementing database models and API routes for event creation, retrieval, and updates.

Skills: Next.js, TypeScript, PostgreSQL, Supabase, Prisma ORM, Tailwind CSS, Git, Full-Stack Development
